

**Exploiting video-tracking data to dissect  
 water maze learning and strategy choice in mutant mice**

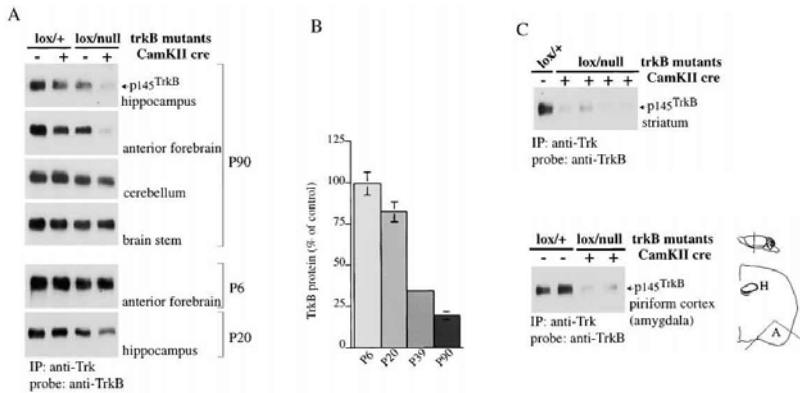

David P. Wolfer  
 Neuroanatomy and Behavior, Institute of Anatomy  
 University of Zurich

david@dpwolfer.ch, <http://www.dpwolfer.ch>

**Conditional ablation of *trkB* using CRE-lox system**

*Neuron* 24:401, 1999

## Hippocampal synaptic plasticity in *trkB*-CRE mice

*Neuron* 24:401, 1999

In vitro LTP reduced in CA1 of homozygous mutant mice, heterozygous animals show intermediate phenotype.

## Place navigation in the watermaze

Morris RGM,  
Learn Motiv, 12:239-260, 1981

Morris RGM et al.,  
Nature, 297:681-683, 1982

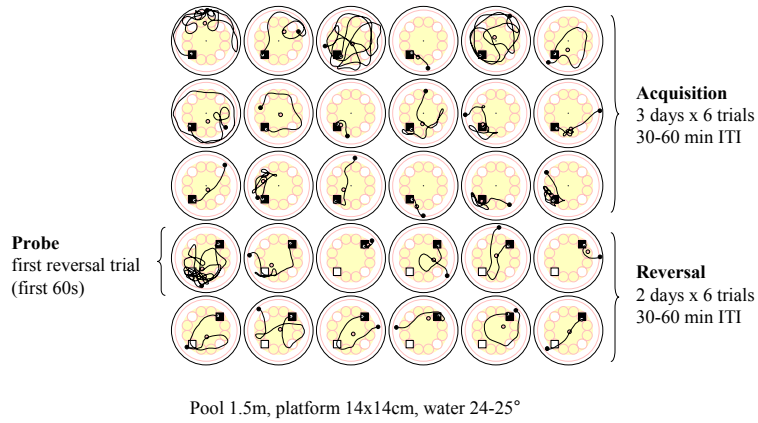

Morris RGM,  
J Neurosci Meth, 11:47-60, 1984

Morris RGM et al.,  
Nature, 319:774-778, 1986

### Parameters

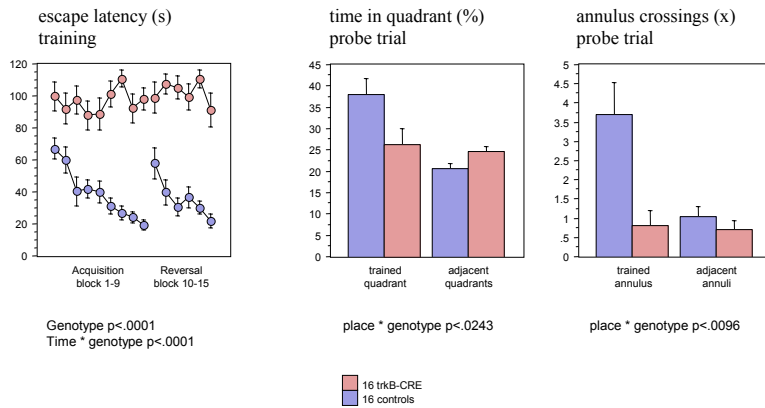

- escape latency (training)
- time in quadrant (probe trial)
- annulus crossings (probe trial)

## Place navigation protocol in Zurich

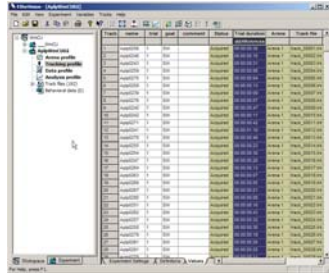

## Swimming navigation in *trkB*-CRE mice

*Neuron* 24:401, 1999

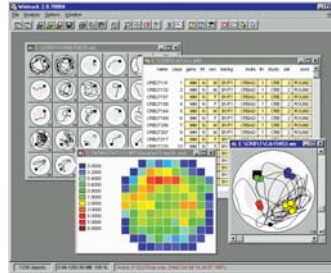

## Off-line data analysis

*Physiol Behav* 73:745, 2001

## Swimming navigation in *trkB*-CRE mice

search error (m\*s)  
training

Genotype  $p < .0001$   
Time \* genotype  $p < .0001$

path efficiency (%)  
training

Genotype  $p < .0001$   
Time \* genotype  $p < .0024$

“proximity” (m)  
probe trial

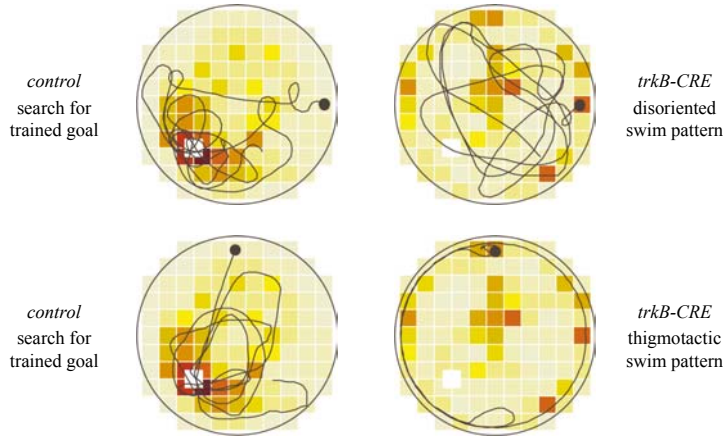

Genotype  $p < .0088$

■ 16 *trkB*-CRE  
■ 16 controls

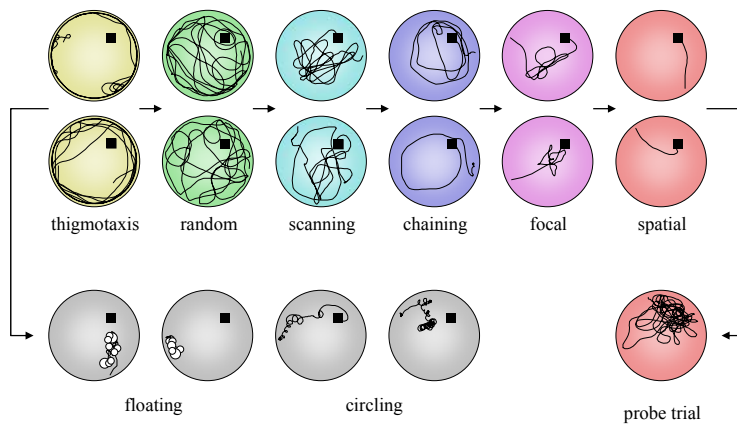

### Watermaze transfer test in *trkB*-CRE mice

*Neuron* 24:401, 1999

### Strategies and swim patterns of mice in the watermaze

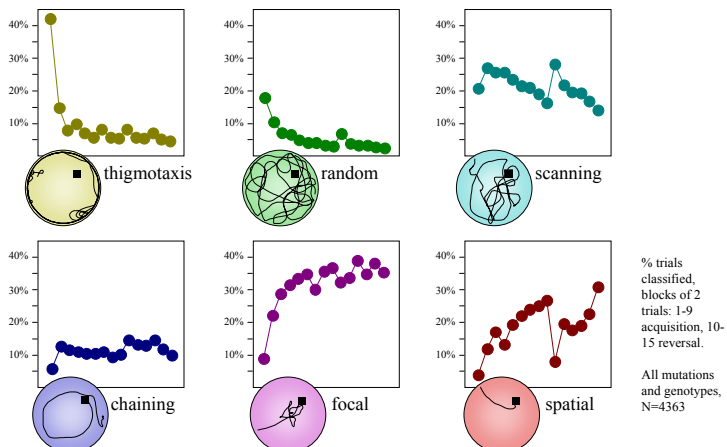

*Exp Physiol* 85:627, 2000

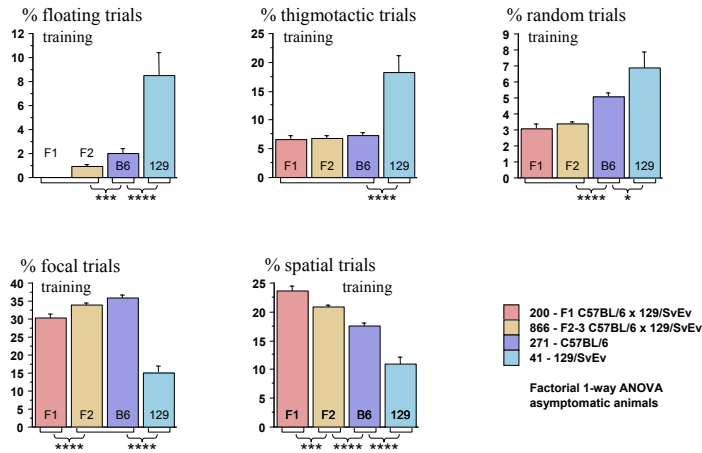

## Automatic classification of watermaze trials

## Prevalence of strategies and swim patterns reflects time course of watermaze learning

### Effect of genetic background and hybrid vigor on strategy choice during water-maze training

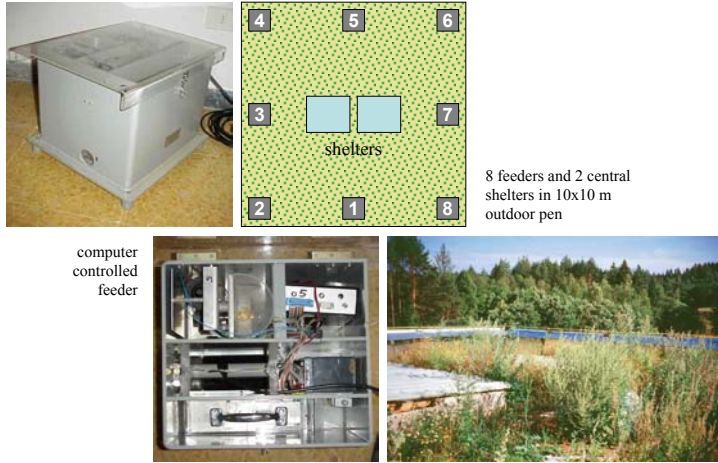

### Early adaptation in the watermaze blocked in mice lacking forebrain TrkB receptors

## Spatial learning under naturalistic conditions

*Hippocampus* 12:27, 2002; *TINS* 25:344, 2002

## Conditional *trkB* KO mice show reduced behavioral flexibility but *normal spatial memory* in a naturalistic setting

*Hippocampus* 12:27, 2002; *TINS* 25:344, 2002
